About ICAN

International Conference for Autism and Neurodevelopment Disorders is a unique conference for parents and professionals. It is a special opportunity to connect with medical professionals dealing with autism and speak to them on one to one basis. ICAN is intended to facilitate exchange of ideas and clinical results between parents and professionals to better the care for the people on the Autism Spectrum. At ICAN the newest and the latest development research happening all over the world and all the newer treatments for Autism will be discussed. This Conference will provide a unique platform for scientific and medical discussion and the final beneficiaries will be the children on the Autism Spectrum.

Inauguration of 3 Autism Connect's Initiatives

• Digital Rehabilitation for Autism

A path breaking Digital platform offering app based Rehabilitation services, which will enable children with autism to get rehabilitation services at the comfort of their homes with therapists from across the world.

• Autism Connect Book Launch in 4 Languages

Autism Connect has already published a book "Treatments for Autism" in English which was inaugurated by the Legendary Chef Sanjeev Kapoor. We are now launching the book in 4 different languages : Arabic, Turkish, German and French.

• Panda Mama Autism Connect Child Companion

PMAC child companion is a specially designed assistive device that will be equipped with artificial intelligence to respond to the different moods and behaviors of children with Autism. Using specialized voice modulated stories and teaching this child companion is intended to play a supplementary role in behavior modification and improving speech.
